the perfect non-profit app

ZWARM *team platforms*

Everything You Need

Community **is ready for your team.** All the typical tools needed to manage a non-profit are available to you right away. Donor management, thank you letters, campaigns grants, projects and more.

Just sign up, log on, and get to work. Your team will never again have to juggle Excel sheets, wrangle reports, or search frantically for lost data.

Everything You Want

We saved the best for last. **Perhaps the best part of Community is the ability to tailor it to your exact needs**. Not only can we tweak existing functions to your liking, but we can add entire custom built sections to handle any or all of your team's demands. **Thank to its cutting edge Claris Filemaker foundation, nothing is out of reach**. The sky's the limit, just ask.
